POTATO

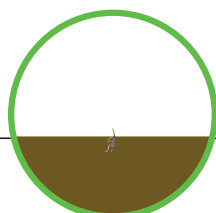

An integrated, system-based approach to maximize vegetative growth, improve tuber formation, and promote even bloom.

Program Key Benefits

- Provides key nutrients and enzymatic-based biologicals at key growth stages to promote early root development, optimize nutrient uptake and improve overall plant health.
- Utilizes highly concentrated potassium to enhance carbohydrate metabolism, which directly influences tuber size and quality.
- Initiates even bloom and provides highly soluble calcium to strengthen cell walls, improve tuber firmness and even starch deposition while reducing risk of disease and internal disorders like hollow heart.
- Maintains plant vigor during the final stages and aids in stress resistance, enhancing marketable yield.

AT PLANTING

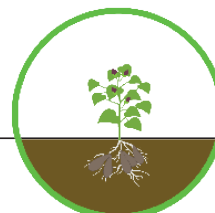

IGNITION™
ACCELERATE™
REV UP™
EDTA ZN

TUBER INITIATION 14-21 DAYS PRE-BLOOM

IGNITION PRO™ **REV UP™**
FAST TRACK™ **DRAFT™**
ACCELERATE™ **RESTART™**

TUBER DEVELOPMENT & MATURATION AT BLOOM & AGAIN 14 DAYS LATER

WATER RUN 1

WATER RUN 2

FAST TRACK™
DRAFT™
LIQUA-JIP™

SOIL TREATMENTS

SPLIT OVER 2 APPLICATIONS. FIRST AT PREPLANT IRRIGATION & SECOND AT 4TH-6TH IRRIGATION

THROTTLE™
PENMAX™

*Reduces potential for deoxygenated soil status to help prevent fusarium, phytophthora and other water mold diseases.

Intermountain Ag Solutions will work with you on a customized soil and crop nutrition plan where your yield goals and budget lead to improved ROI.
