

Intermountain
Ag Solutions

DRYLAND *WHEAT*

An integrated, system-based approach to boost yields by improving kernel count and test weight, and fully developing tillers.

Program Key Benefits

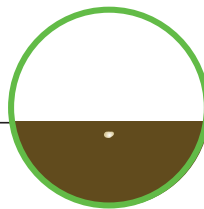

- Boost yields by improving root systems and soil health, building a more drought tolerant plant.
- Improves protein content with late season nitrogen availability and increases kernel count and test weight.
- Initiates fully developed tillers and a thicker, uniform stand with robust heads in the top of the canopy.
- Minimize plant stress by increasing plant health and disease resistance, extending plant life during dry and disease periods.

Intermountain Ag Solutions will work with you on a customized soil and crop nutrition plan where your yield goals and budget lead to improved ROI.

IRRIGATED *WHEAT*

An integrated, system-based approach to boost yields by improving kernel count and test weight, and fully developing tillers.

Program Key Benefits

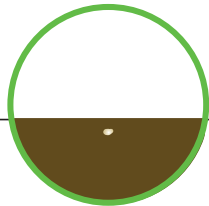

- Boost yields by improving root systems and soil health, building a more drought tolerant plant.
- Initiates fully developed tillers and a thicker, uniform stand with robust heads in the top of the canopy.
- Improves protein content with late season nitrogen availability and increases kernel count and test weight.
- Minimize plant stress by increasing plant health and disease resistance, extending plant life during dry and disease periods.
- Improves water use efficiency through increased speed and depth of infiltration while also helping to leach salts.
