SUGAR BEET

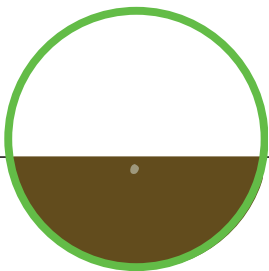

An integrated, system-based approach to maximize yield of marketable crop by improving nutrient density and sizing consistency.

Program Key Benefits

- Provides early season phosphorus availability with a seed-safe formulation.
- IGNITION Pro provides enhanced P mobility into the soil with late season fertigation.
- Balances nutrition for increased sucrose percentage and overall tonnage.
- Optimizes plant health for improved resistance to Rhizoctonia and other diseases.
- Improves soil aggregation which can help decrease dirt on harvested beets resulting in freight cost savings and leaving the soil in your field where it belongs.

AT PLANTING On-Seed
